Digital MARKETING

AL - REDWAN
ELECTROMECHANIC

TEAM 4

Agenda

1. Executive Summary
2. Company Overview
3. Internal Business Analysis
4. Market Research
5. Competitor Analysis
6. Consumer Persona Development
7. Customer Journey Mapping
8. SOSTAC Framework
9. Media Plan
10. Budget & ROI Projection
11. Conclusion

Executive Summary

- Brief About the Company

Al-Redwan For Electromechanics is a leading Egyptian company specialized in providing integrated electromechanical works. With over 12 years of industry experience, the company has established a strong reputation for delivering high-quality engineering services with precision, efficiency, and commitment

Al-Redwan specializes in the supply, installation, and maintenance of:

- Fire Fighting Systems
- Central Air Conditioning Systems (HVAC)
- Medical Gas Systems

The company serves a wide range of sectors including hospitals, factories, shopping malls, construction companies, real estate developers, and governmental projects across Upper Egypt, Cairo, and Giza

Executive Summary

- Project Overview

This project focuses on developing a comprehensive digital marketing and business growth strategy for Al-Redwan For Electromechanics. The aim is to strengthen the company’s digital presence, improve market positioning, attract new business opportunities, and build long-term relationships with clients through integrated marketing communication and customer-driven strategies

The project will apply professional marketing frameworks, market research, competitor analysis, digital transformation strategies, and the SOSTAC model to create a practical roadmap for sustainable business growth

Executive Summary

- Main Objectives

The main objectives of this project are:

1. Build a professional digital presence across multiple channels
2. Generate qualified B2B leads and contracts
3. Strengthen customer trust and brand credibility
4. Expand business opportunities in Upper Egypt, Cairo, and Giza

- Expected Outcomes

Through the implementation of this strategy, the expected outcomes include:

1. Stronger brand visibility and recognition
2. Increased customer engagement
3. Higher lead generation opportunities
4. Better conversion rates into contracts
5. Improved customer loyalty and long-term partnerships
6. Sustainable business growth and market expansion

Company Overview

- Vision

To be the most trusted and pioneering electromechanical works provider in Upper Egypt and Cairo, setting benchmarks in quality, innovation, and sustainable engineering excellence.

- Mission

To deliver integrated electromechanical works through high-quality execution, innovative engineering practices, and exceptional customer service, while maintaining the highest standards of safety, efficiency, and professionalism.

Company Overview

- **Core Values**

  The company's operations are guided by the following core values:

  - **Quality Excellence**
    Delivering projects that meet the highest technical and operational standards
  - **Integrity**
    Building trust through honesty, transparency, and professional ethics
  - **Commitment**
    Ensuring timely project delivery and exceeding client expectations
  - **Innovation**
    Applying modern engineering solutions and advanced technologies
  - **Safety First**
    Prioritizing safety standards in every project and operation
  - **Customer Focus**
    Creating long-term relationships through exceptional service and reliable support.

Company Overview

- **Competitive Advantage**

Al-Redwan’s competitive strengths include:

- 12+ years of industry experience
- Highly skilled and professional team
- Proven ability to execute complex projects
- Reliable post-project maintenance and support
- Strong commitment to deadlines and timely delivery

Internal Business Analysis

- **Business Model**

Al-Redwan For Electromechanics operates under a Business-to-Business (B2B) model, providing specialized electromechanical services to organizations rather than individual consumers.

The company generates revenue through:

- **Project Contracts** for supply and installation services
- **Maintenance Contracts** (preventive & corrective)
- **Consultation & Engineering Services**
- **After-sales technical support and upgrades**

Internal Business Analysis

- **Customer Segments**
  - Hospitals & healthcare facilities
  - Industrial factories
  - Shopping malls & commercial buildings
  - Construction companies
  - Real estate developers
  - Governmental entities

Internal Business Analysis

- **Current Digital Presence Audit**

  Al-Redwan already has an existing digital presence on Facebook and Instagram; however, both platforms require further professional enhancement to better reflect the company's identity and capabilities.

  - Improve overall branding consistency across both pages to ensure a more professional and unified visual identity .
  - Upgrade content quality to better showcase engineering projects and technical expertise .
  - Optimize page setup (bio, highlights, contact information) for better clarity and accessibility .
  - Implement digital marketing strategies to improve reach and attract potential clients .

Internal Business Analysis

- **Current Gaps**

  - No official website
  - No LinkedIn business page
  - Limited SEO presence
  - Lack of content strategy

Internal Business Analysis

- **Marketing Mix (7Ps)**
  - **1 Product**
    Integrated electromechanical engineering works:
    - Fire Fighting Systems
    - Medical Gas Systems
    - HVAC Systems
  - **2 Price**
    Competitive project-based pricing depending on scope, specifications, and contract size.
  - 3 **Place**
    Operations across:
    -Upper Egypt
    -Cairo
    -Giza

Internal Business Analysis

- **Marketing Mix (7Ps)**
  - **4 Promotion**

    Current promotion channels are limited to:

    - Facebook
    - Instagram

    Potential channels

    - LinkedIn
    - Website SEO
    - Google Ads
    - WhatsApp Business
    - Video marketing
    - Email marketing

Internal Business Analysis

- **Marketing Mix (7Ps)**
  - **5 People**
    Highly qualified engineers, technicians, and project management teams.
  - **6 Process**
    Professional workflow from consultation → engineering design → implementation → quality control → delivery → maintenance.
  - **7 Physical Evidence**
    - Completed projects portfolio
    - Engineering drawings
    - Project documentation & specifications
    - Client references & testimonials
    - Site & service reports

Internal Business Analysis

- **Sales Funnel Analysis**
  - **1 Awareness Stage**

    Currently, Al-Redwan's brand awareness is primarily driven by traditional and relationship-based channels, including:

    - Word-of-mouth referrals
    - Strong market reputation in Upper Egypt and Cairo
    - Long-term relationships with contractors and consultants

While these channels have been effective, they limit scalability and broader market reach.

Internal Business Analysis

- **Sales Funnel Analysis**
  - **2 Interest Stage**
    Interest is generated through direct and experience-based interactions such as:
    - Previous project references and portfolio
    - Direct client inquiries
    - Professional networking within the engineering sector

However, there is minimal use of digital platforms to actively attract or engage potential clients.

Internal Business Analysis

- **Sales Funnel Analysis**
  - **3 Consideration Stage**

    At this stage, potential clients evaluate the company based on:

    - Technical expertise and engineering capabilities
    - Competitive pricing
    - Company reputation and past performance
    - Commitment to deadlines and project delivery

The process is strong but relies heavily on offline credibility rather than structured digital proof (e.g., case studies, online presence).

Internal Business Analysis

- **Sales Funnel Analysis**
  - **4 Conversion Stage**

    Conversion mainly occurs through:

    - Technical and financial proposals
    - Negotiations with clients

This stage is well-developed due to the company's experience, but lacks integration with a lead tracking system.

  - **5 Retention Stage**

    Client retention depends on:

    - Quality of execution
    - Maintenance and after-sales services

Despite strong retention through performance, there is no professional system for customer engagement, feedback collection, or loyalty building.

Internal Business Analysis

- **Sales Funnel Analysis**
  - **Identified Gap**

    The key gap in Al-Redwan's sales funnel is the absence of a structured digital marketing and lead generation system. Specifically:

    - No digital awareness channels (e.g., website SEO, social media, paid ads)
    - No lead nurturing strategy (email marketing, content marketing)
    - Limited data-driven decision making

This results in missed opportunities for scaling, inconsistent lead flow, and over-reliance on personal networks.

Internal Business Analysis

- **SWOT Analysis**
  - **Strengths**
    - Strong market reputation
    - +12 years of experience
    - Skilled engineering team
    - Quality project execution
    - Diverse service portfolio
    - Reliable maintenance services
  - **Weaknesses**
    - Limited digital presence
    - No dedicated sales funnel
    - Lack of CRM system

Internal Business Analysis

- **SWOT Analysis**
  - **Opportunities**
    - Rapid infrastructure growth in Egypt
    - Increased demand in healthcare projects
    - Real estate expansion
  - **Threats**
    - Strong market competition
    - Economic instability
    - Delayed project payments

Internal Business Analysis

- **Brand Positioning**

Al-Redwan For Electromechanics is positioned as a trusted provider of high-quality electromechanical solutions, with a proven track record of delivering projects on time and to the highest standards.

- **Brand Promise**

Quality that creates safety… Integrity that makes the difference.

- **Unique Selling Point (USP)**

We guarantee on-time project delivery through disciplined execution and strict schedule control.

Market Research
Market Analysis

- **Industry Overview**

The electromechanical engineering sector in Egypt represents a cornerstone of the country's infrastructure and construction ecosystem, playing a critical role in enabling sustainable development across key industries. The sector integrates mechanical systems—such as HVAC, plumbing, and fire protection—with electrical systems including power distribution, lighting, and Current / Low Voltage Systems, forming the backbone of modern facilities.

Over the past decade, the industry has experienced consistent growth, driven by Egypt's expanding urban landscape, population increase, and ambitious government-led development programs. Large-scale national projects—ranging from healthcare facility expansions and industrial zones to commercial developments and smart city initiatives—have significantly increased demand for high-quality, reliable electromechanical services.

Market Research

- **Industry Overview**

The competitive landscape is defined by a mix of established firms and startups, where differentiation is achieved through technical excellence, efficient project execution, adherence to international standards, and the ability to deliver integrated, cost-effective solutions. Companies that demonstrate strong engineering capabilities and disciplined project management practices are better positioned to meet the evolving requirements of complex projects.

Furthermore, the sector is undergoing a transformation shaped by global trends such as energy efficiency, sustainability, and digital integration. Clients are increasingly prioritizing environmentally responsible solutions, optimized system performance, and the adoption of smart technologies, creating new opportunities for forward-thinking engineering firms.

Market Research

- **Market Size**

Egypt’s construction and infrastructure market is experiencing substantial growth, making the electromechanical services sector one of the fastest-growing engineering service markets in the country.

Key sectors contributing to market demand include:

1 Healthcare Sector

- Hospitals
- Medical centers
- Specialized clinics

2 Construction & Real Estate Sector

- Residential compounds
- Commercial towers
- Shopping malls

Market Research

- **Market Size**

Egypt’s construction and infrastructure market is experiencing substantial growth, making the electromechanical services sector one of the fastest-growing engineering service markets in the country.

Key sectors contributing to market demand include:

1 Healthcare Sector

- Hospitals
- Medical centers
- Specialized clinics

2 Construction & Real Estate Sector

- Residential compounds
- Commercial towers
- Shopping malls
- Mixed-use developments

Market Research

- **Market Size**

3 Industrial Sector

- Factories
- Manufacturing plants
- Warehouses

4 Governmental Projects

- Public hospitals
- Administrative buildings
- Educational institutions
- Infrastructure developments

The market presents significant opportunities for companies capable of delivering integrated supply, installation, and maintenance services.

Market Research

- **Growth Trends**

Several trends are shaping the future of the electromechanical market in Egypt:

1 Infrastructure Expansion
Large-scale national projects continue to drive demand for electromechanical systems.

2 Healthcare Growth
Increasing investments in hospitals and medical facilities boost demand for Medical Gas Systems and Fire Safety Solutions.

3 Energy Efficiency Focus
Growing adoption of energy-efficient HVAC systems and smart building technologies.

Market Research

- **Growth Trends**

4 Safety Regulations
Stricter fire safety compliance requirements increase demand for advanced fire protection systems.
5 Digital Transformation
Clients increasingly prefer contractors with strong digital presence, fast communication, and professional project showcasing.
6 Preventive Maintenance Demand
Growing awareness of long-term maintenance contracts for operational sustainability.

Market Research

- **Demand Forecast**

  The demand for electromechanical services in Egypt is expected to grow steadily over the coming years due to:

  - Government spending on infrastructure projects
  - Growth in commercial and mixed-use developments
  - Rising demand for integrated engineering services
  - Increased industrial investment
  - Expansion of private real estate development in Cairo, Giza, and Upper Egypt

Market Research

- **Demand Forecast**

Forecast for Al-Redwan:
Given its expertise, service portfolio, and regional presence, Al-Redwan is well-positioned to capitalize on this growing market by:

- **Expanding digitally**
- **Strengthening brand positioning**
- **Building strategic partnerships**
- **Improving lead generation systems**
- **Offering long-term maintenance contracts**

This positions the company for sustainable growth and market leadership in Upper Egypt, Cairo, and Giza.

Market Research

Market Process

- **How Procurement Happens in This Industry**

  Procurement in the electromechanical industry is typically a Business-to-Business (B2B) purchasing process that involves technical evaluation, financial review, and project requirement alignment before supplier selection.

  The procurement process usually begins when a client identifies the need for electromechanical systems during the planning or development stage of a project. This may include requirements for HVAC systems, fire fighting systems, or medical gas systems, depending on the project type.

Market Research
Market Process

The client then seeks qualified contractors based on:

- Technical expertise
- Previous project portfolio
- Company reputation
- Compliance with safety standards
- Pricing competitiveness
- Delivery capability
- Maintenance support

Market Research
Market Process

For Al-Redwan, procurement opportunities mainly arise through:

- Direct business relationships
- Contractor partnerships
- Project referrals
- Government tenders
- Developer negotiations
- Engineering consultations
- Digital lead generation channels (future opportunity)

Market Research
Market Process

- **Buying Cycle**

  The buying cycle in the electromechanical market is generally longer than traditional markets due to project scale and technical complexity.

  Stage 1: Need Identification
  The client identifies project requirements such as:
  - Cooling systems
  - Fire safety systems
  - Medical gas infrastructure

Market Research
Market Process

- **Buying Cycle**

  Stage 2: Research & Supplier Search
  Clients search for contractors through:
  - **Market referrals**
  - **Existing networks**
  - **Company profiles**
  - **Previous projects**
  - **Digital platforms (LinkedIn / Google / Website)**

Market Research
Market Process

- Buying Cycle

  Stage 3: Technical Evaluation

  Suppliers are evaluated based on:

  - Engineering capability
  - Technical proposal quality
  - Certifications
  - Project experience
  - Team qualifications

Market Research
Market Process

- **Buying Cycle**

  Stage 5: Contract Award
  The selected company is awarded the contract and project execution begins.

  Stage 6: Post-Project Relationship
  Maintenance, technical support, and relationship management become essential for future contracts and referrals.

Market Research
Market Process

- **Tendering Process**

  Tendering is one of the most common procurement methods in this industry.

  1 Tender Announcement

  Projects are announced by:

  - **Government entities**
  - **Hospitals**
  - **Developers**
  - **Contractors**

  Prequalification

Market Research
Market Process

- Tendering Process

Prequalification

Companies are shortlisted based on:

- Experience
- Technical capability
- Financial strength
- Previous projects
- Compliance documentation

Bid Submission

Companies submit:

- Technical proposal
- Financial proposal
- Execution timeline

Market Research
Market Process

- Tendering Process

Evaluation

Selection is based on:

- Technical compliance
- Price competitiveness
- Company reputation
- Project delivery capability

Contract Award

The best-qualified supplier receives the contract.

Market Research
Market Process

- Tendering Process

Opportunity for Al-Redwan

To improve procurement opportunities, Al-Redwan should focus on:

- Building a strong digital company profile
- Creating a professional website
- Creating a LinkedIn Profile
- Showcasing project case studies
- Building partnerships with consultants and developers
- Establishing a CRM for lead tracking
- Improving tender submission branding and documentation

Market Research
Market Process

- Decision Makers

Decision-making in B2B electromechanical purchasing usually involves multiple stakeholders.

1 Technical Decision Makers

- Project Engineers
- Consultants
- Technical Managers
- Facility Managers

2 Financial Decision Makers

- Procurement Managers
- Finance Managers
- Investment Committees

Market Research
Market Process

- Decision Makers

3 Executive Decision Makers

- Company Owners
- CEOs / Managing Directors
- Board Members
- Government Committees

4 Influencers

- MEP Consultants
- Contractors
- Industry partners

For Al-Redwan, the strongest influence channels are likely contractors, consultants, and project owners.

Market Research
Customer Research

- **Customer Needs**

Customers in the electromechanical sector seek reliable, efficient, and high-quality engineering solutions that support their operational goals while ensuring safety, compliance, and long-term performance. Their primary needs include:

- **Technical Excellence**

Clients require technical solutions that meet engineering standards and project specifications.

- **Integrated Solutions**

Clients prefer contractors who can provide complete services including supply, installation, commissioning, and maintenance.

- **Project Reliability**

Timely execution and commitment to delivery schedules are essential, especially for hospitals, commercial projects, and industrial facilities.

Market Research
Customer Research

- **Customer Needs**
  - **Safety & Compliance**

Strict adherence to fire safety regulations, healthcare standards, and technical compliance is critical.

  - **Operational Efficiency**

Systems should be energy-efficient, durable, and easy to maintain over the long term.

  - **After-Sales Support**

Clients expect reliable maintenance services, technical support, and quick response to operational issues.
